Summary

Currently studying Computer Science online at UiT. Got a bachelor degree in Mechanical Engineering, but would like to switch due to my love for everything computers. Enjoy a hot cup of coffee in the morning before hitting the gym. A couple more afterwards while problem-solving. Interested in learning new technologies and increase my knowledge in those I am familiar with. With a love for learning, a professional attitude I can contribute to any workplace. And as an amateur athlete I hope we can all exercise more often.

Work Experience

Cargo - Restaurant & Bar

Oslo, Norway

RUNNER

April. 2017 - August. 2017

- As the most efficient and responsible runner I had received management of all other runners employed during that summer.
- Responsible for delivering food and water to the a very busy restaurant during the summer.

HiOA - Oslo and Akershus University College of Applied Sciences

Oslo, Norway

B.S. IN MECHANICAL ENGINEERING

August. 2014 - June. 2017

- Got my bachelor degree in Mechanical Engineering with a C as average grade.
- Classified thesis: "Guideline for finite element based approval of controllable pitch propellers" in collaboration with DNV GL.

Skills

- JAVA **B**, Exam at University. Enjoy developing with Java and continue to increase my knowledge everyday
- SQL **TBA**, Soon to take exam. Really enjoy working with databases.
- MATLAB **B**, Exam at university. Quite experienced with MATLAB. Used for Bachelor thesis and took exam this fall.
- CAD **B**, On my bachelor thesis in Mechanical Engineering which relied heavily on CAD and FEA.
- FEA **B**, On my bachelor thesis in Mechanical Engineering which relied heavily on CAD and FEA
- HTML **TBA**, Learned front-end on my own as a kid. HTML and CSS is something I've always been fond of.
